

# Fixed 32-Rack Feeder-Buffer Architecture

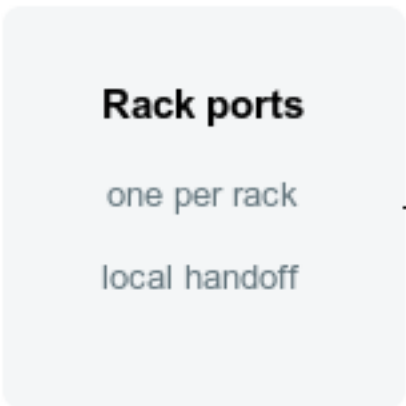

32 rack-local shuttles preserve locality; 8 feeder groups keep fixed readers supplied.

## System overview

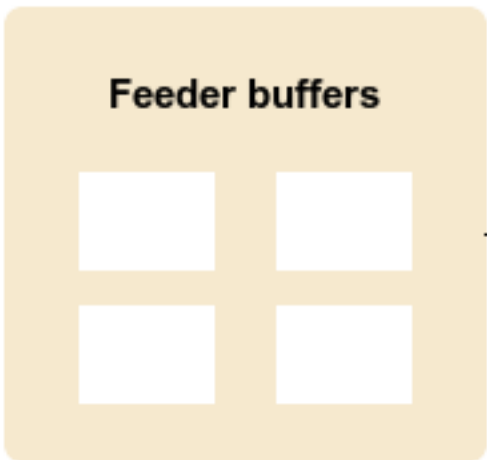

32 racks × 16 m

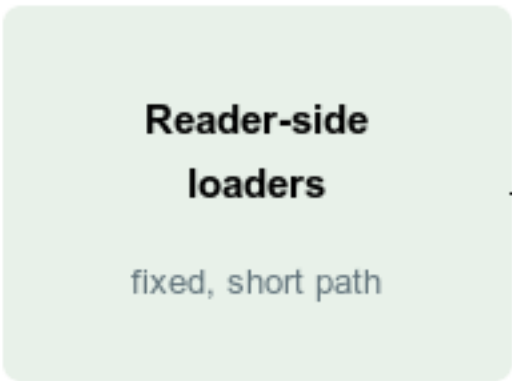

32 rack-facing ports

8 feeder groups

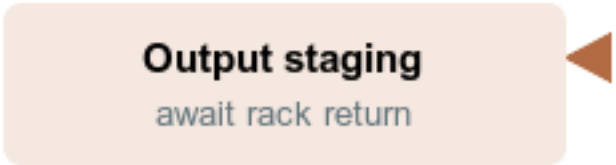

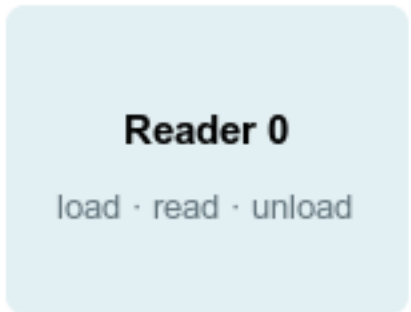

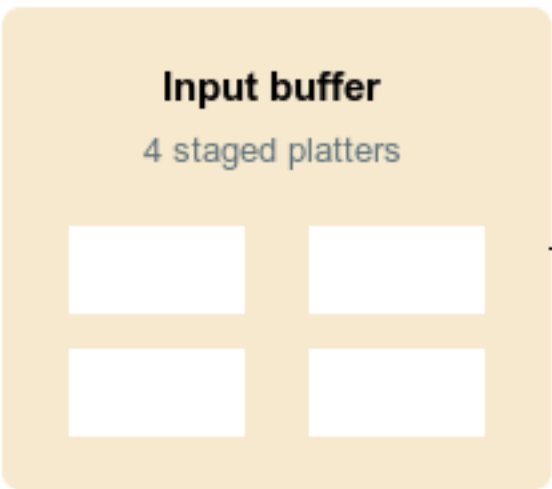

8 reader-side loaders

8 readers

## Zoom: one feeder group serves four rack-local zones

completed platter returns to its home rack

Demand-driven staging only: requests must arrive before a platter is prefetched.
